

RISK MANAGEMENT

Security Assessments:

- **Cloud Assessments** – Offensive penetration testing against Azure, AWS, and GCP platforms.
- **Red/Purple Teaming** – Simulate and defend against tactics, techniques, and procedures.
- **Penetration Testing** – Automated and manual identification and exploitation of vulnerabilities.
- **Phishing Assessments** – Socially engineered email based attacks that enhance end user awareness.
- **Vulnerability Assessments** – Automated scans that identify vulnerabilities and misconfigurations.
- **Wireless Assessments** – Identification and mitigation of weak encryption and misconfigurations.

Security Programs:

- **Comprehensive Cybersecurity Assessments** – Evaluation and gap analysis of controls against the ISO/IEC 27002 standard.
- **Tailored Cybersecurity Assessments** – Evaluation and gap analysis of controls against applicable frameworks.

SPECIALIZED SECURITY

- **Cyber Threat Intelligence** – Actionable and insightful threat information for proactive security.
- **Incident Response** – Identify, Contain, Investigate, and Remediate cyber incidents.
- **Threat Hunting** – Discovery of unknown compromises or leaked organizational data.

TRUSTED ADVISORY

Diverse suite of affordable security advisory services to meet an organization's specific needs:

- **Auditors, Regulators, Third-party and Vendor Support**
- **Incident Management Guidance**
- **Policy and Process Development**
- **Threat and Vulnerability Management**
- **Security Research**
- **Security Awareness Training**
- **Security and Compliance Strategy and Roadmap**
